The Historyof

Introduction

time similarproblemshavebeen encountered in a dequate finances, over crowded class rooms critical newspapered itorials, conflict between school board, administration and teachers and public controvers your elections.

A searchof the available public records also reveals that Tucson Unified School District has been a state and national leader in education for many

Professional qualification for teachers ose throughout the years. The minimum education allevel for employment as at each erincrease from high school graduate more than a century ago, to normal school graduate, to the current minimum bachelor's degree requirement. Foat leasthalf of its history, it was policy to hire only experience deachers. Even to day, the majority of teachers hired have some experience before coming to TUSD.

Formany decades the neighborhoods choolwas the ideal, and schools were built to support that ideal. Yet, with scattered population, a "neighborhor,"

The Congres Street School ong since demolished was the first publicly constructed, rather than rented, facility of School District 1. The sum of \$9,782, including a \$2000 loan, was spent to construct the three-room school, which was located on the northwest corner of what is now Congres and Sixth Street. No tax money was used to build the school; instead, funds were raised by cakes ales, so cials, contributions, and the sale of a goat. The ladies of Tucson were responsible or the fund-raising efforts.

Notes

(1) James F. Cooper,

were required to choose three from English Literature Universal History, Latin Bookkeeping, Commercia Arithmetic, Algebra, Geometry and Natural Philosophy all were taught by three male teachers.

A kindergartenclass and the "study of the nature of alcoholicdrinks and narcotics and their effecton the human system" were introduced in 1886. District enrollment figures in 1887-88 showed 21 high schools tudents, 117 grammars chools tudents, 107 intermediate pupils, and 283 primary students for a total of 528. Tenteachers serve this population. A policy was introduced the next year limiting each teacher's class rolto 40 pupils. The high school boasted a "new laboratory, reading room, and library."

Evenin the earlyyearsof the schooldistrict, student conductwas a concern. Notes from the Tucson PublicSchool—DisciplineBook of 1887 mentions mall incidents such as throwing stones, insolence toward the teacher, and taking screws out of the ink well. An October 7, 1887, notation reveals that "Zoe Knapp told Myra Drachmanthat Clara Fishand Ann Sanfordwere speaking"

there were not enoughstudents. Two years later, the public voted against a speciatax election for \$4,000. As a result, the schools close two months early. The first school district budget was prepared in the summer of 1898, when the Clerkof the School Board notified the

preservation of school buildings, grounds, furniture, apparatus, and other school property.

Salaries in 1910 were \$75 to \$90 amonth for grammars choolteachers and \$1000 to \$1200 for the ninemonth term for high school teachers. The principal earned \$1400 for 12 months. By 1917, aminimum salary for teachers was established at \$100 as chool month. Was fa\$J 0 Tc nlis() 2 y(e) 0.7 (a) -1.9 rf ta.

penmanship.

The Tucson Education Association was started in 1917 by three educators in the district: Alice Vail, Mary Duffy and Anne Rogers Formany years thereafte the education association and the school district administration were closely connected. Many former presidents of the Tucson Education Association have had school snamed in their honor, for their services as educators and administrators in the school district, including the three founders.

A night schoolopenedin 1917with classes incommercial Spanishtypewriting, shorthand, stenographer trainer, dressmaking shoparithmetic, auto repair and construction, architectural drawing, business English folk dancing and Red Crossin struction. At the same time, high school students received permission to hold dances Summers chool for a six-week period as open for students with poor grades.

Federal aidwasacceptedin 1918 for the support of vocational industrial education, vocational agriculture and home economics. Further use of technology was in the form of the purchase of a motion picture machine for the high school, and the first powered vehicle in 1918, a Buicktruck with "demountable rims, electric lights and an electric self-starte," for the price of \$905.

SegregationBegins

In the early years of the schooldistrict, the student population was primarily Hispanic. The few African American children were included with the larger number of Anglos, but both groups were minorities in the earliest school population. Assettlers from the East moved into the territory, the numbers changed, with Anglos slowly assuming the majority status. Students of Mexicandes centwere never legally segregated.

Territorial legislation had beeppassed in 1909 requiring the segregation of pupils of the African race from pupils of the White race. "A 1910 enrollment assessments howed more than 2,300 students in grades 1-12, including 41 Negroes in the first eight grades. By 1912, "a committee of Negroes men and women, of the number of seven, Riv (es)-3 ev

1011/201240 (TWo2hi713)

Administrative offices ad beenlocated inside the Safford School until 1927. The need for more class rooms pace forced a move to a house across the street from Safford, and agarage was built to hold the school buses and trucks in 1928.

Towardthe end of the decade, the school board voted to tear down the

bond election passed or "55 percent money" to be used for additions to various renovation and addition projects. However, an April 1938 bond question for a total of \$750,000 ram not stiff opposition from the Star, but support from the Citizen.

The Citizene ditorialized: "Worst of all, there are 38 teachers in the schoolsystem who have no regular rooms at all, and they and their classes must

lumber and hardware for an additional room, the Yaquiswould furnish the adobe and labor. The district accepted the offer. Planswere also made to enlarge Dunbar, Government Heights and El Rio Schools.

In the spring of 1941 Superintenden Rosecalledonce again for a bond election for \$450,000 to build a new junior high school, two new elementary schools, a new administration building, and remodel of the high school, as well as other additions. The vote was successful.

Clinton E. Rosepassedaway in 1942. In a June 1942, Starobituary, his successodescribed him in this way: "During his superintendency he worked assiduously

Educationclasses imachinists'weldingand sheetmetal airplaneconstruction. Oncethe war involved U.S.forces, the schoolboard responded calmly to a request for air raid identification tags for school children, saying, "As the need for action in this matter seems more or less remote the recommendation of the committee in charge of Air Raid Defense was tabled for future action." The board also decided not to take action to procure war insurance on the school buildings. In September 1942, Superintendent Morrow reported that the district was receiving four to seven resignations a week from both male and female teachers entering the services.

Duringthe war years, the government financed nurseries; taffed by the school district. These, however, were closed in the fall of 1945 when federal funds were with drawn. The need or defense workers rose to such a level that teachers were permitted to work at the Consolidate Aircraft Planton Saturdays and Sundays and not more than two hours per day during the week. By 1943, service meaning from the war with discharges from wounds or other physical reasons Many that exercises were returned to the same of the school of the school

Morrow had reported to the schoolboard that the combined efforts of the counseling testing, and guidance programs had brought "the number of pupils who drop out of schooldown to the lowest in the history of the schoolsystem" with tardiness and truancy reduced by 65 percent.

Pressedby continuing demands for new buildings, the school board conducted an extensive study of a year-rounds chool proposal, but after surveying the community, concluded that few parents actually supported the concept. The ideawas formally rejected in 950. The plan surface dagain in the '60s, and once again was rejected as not cost-effective or acceptable to parents.

The year 1952 marked the organization of what would become the Education a Materials Center. Originally known as the Instructional Aids Department and house dat the administrative offices, the department was a collection of "visual aids, "including charts, maps, projected, display, and recorded materials and the audiovisuations needed to use them. The name was changed in 1963 to reflect the broad use of materials. The EMC provided district 1963

January19, 1949, and took apublic stand in opposition to segregation of Negrochildren. The state legislatured id repeal the law on March 30, 1951, and that fall, Tucson School District 1 became the first school district in Arizonato desegregate arning national recognition for having done so.

Thechangewasaccomplished peacefully in largert. Morrow recalled having been called hames such as "nigger-lover," "fascist, "and "Nazi" by a few groups in town, but the board moved ahead unanimously (23). Letters were sent to all schoolstaff members, meetings were held with parent and community groups, and students were assigned to the schools closest to their homes. The new spapers were totally supportive of the action. African Americante achers were no longer restricted to just one school, although many remained on the west side. On May 28, 1951, Dunbar School graduated its last class. The nit was renamed John Spring Junior High, after the district's second teacher. dih,.

Doole mad been abasket ball coach at Tucson High for 20 years, with phenomenal success At one time the Doolen coached teams won 51 consecutive games.

The Post-War Building Boom

Thefirst post-war buildingboom in TucsonSchoolDistrict 1 was financed through two successful bond elections in 1946 and 1948. The 1946 \$2.1 million combined bond issues provided ditions to EIRio, Government Heights, Blenman, Mission Viewand Wakefield Junior High, and provided the funds for a new 15-room elementary school to be named in memory of C.E. Rose Located at 710 W. Michigan, its original cost was \$261,493 Further, overcrowded Tucson High School would receive badly needed new class rooms and a new Vocational Building.

 Other schools built through the 1948 bond is sue included the 6-class room Cragin Elementary named for the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 and 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in 1950 for \$106,514, Cragin assince had 16 are the first school nurse, Mrs. Gertrude Cragin Built in

The district reache its present geographics izethrough a final annexation of the southwest corner in June, 1951. The areawas unorganized and contained no school. At various times over the years newspaper and board minutes mentioned annexing the Catalina Foothills District, but nothing came of the discussions.

to be used to advise the school district and the community on various aspects of district administration and needs, as well as build community support for the district.

Educators'Economic Conditions

RobertMorrow worked diligentlythrough the '50s and '60s to bring about changes in state support for public schools, seeking equalization funding across school districts and provision of a broader base for school funds. Morrow also sought changes in 1950 to the Teachers Retirement System to allow all school personnel to enroll.

For the first time in 1951 the principals of elementary schools had clerical help. By the end of the decade, policy was established o provide two full-time clerical employees or schools with 25 or more teachers. Salaries or elementary principals were based on the number of teachers supervised with three tiers resting at less than 12 teachers, between 12 and 22 teachers, and more than 23. Junior high school principals were paid \$200 more than elementary school administrators at the same sizing tiers.

Thewartime practice of hiring married women as teachers became apermanent part of the system. Also,

had been designed or 1,500 students, opened with an enrollment of 2,000. Prior to the completion of the building, students had attended Tucson Highon split sessions with Catalin as tudents attending the afternoon session.

Another Bond Election Passes

Onceagainthe publicapproved abond election for the schools in 1955 for a combined total of \$8,585,000 From these proceeds, seven elementary schools one junior high school, and one high school were constructed, with additions made to ten other schools.

HowenstineSchoolwasdesignedfor SpeciaEducationclassesandwasoriginallylocatednearthe district maintenanceshopson Winsett Boulevardwhen it wasdedicatedin early 1958. The schoolhad formerly been a federal housing project which was donated to the school district along with the site. Modifications to make the housing project usable as a school came to \$40,000. Howenstine provided a 3-year program of vocational training for special education , 42001

Liability and casualty in surance premiums for the district in the early 1980s went from \$620,000 to \$1.45 million in one year, and then increase another \$200,000 before the first premium was paid on the new policy.

In December 1980, the schooldistrict faced a potential \$910,000 deficit in the operating budget. Cuts

positions. Howeverastime passed budgetary problems became the overriding issuefacing the district.

TheannualRIFof teachersgrew to larger and large numbers. In April 1981, 454 teachers receive IF notices. The number equaled all of the non-tenured teachers in the district. By fall, all of them had been re-hired. A \$10 activity fee for all high schools ports and extracurricular activities was charged to help meet budgets hortfalls, along with a reduction in high school graduation requirements and elimination of high school classes with lower rollments. The average class size for high schools went from 22-25 to 27-29 students. High school department chair menwere reduced to five per school, and a loss of \$1.1 million in federal Title I funds eliminated 130 class room teacher aides. Reading source teachers and other specialists such as speech herapists, social workers, psychologists adaptive education counselors, and health clerks were reduced in number.

and hundreds of requests for information on a daily basis.

A Stareditorial inFebruary1985, described the situation: "...The Coalition for Educational Excellence....calle for Grant's immediate resignation in December described his five years as a failure of management procedures, processes and style which inspire confidence trust and loyalty... In a three-year period, Grant, shook up the administrative staff considerably and therein lies the source of much criticism against him. Out of 192 administrative staff members, 90 percentare either new to the district or have been transferred or promoted. That disappointed and disenchanted lot of people..."

TheMagett Interval

Dr. Dorothy Magett was named Interim Acting Superintendent a week lateas a national search for the next superintendent was launched. Dr. Magett was first hired by Merrill Grant into central administration in 1982, and then promoted to deputy superintendent in 1983. Now she was the fourth woman in TUS Distory, and the only African American to serve temporarily as the chief administrator. Dorothy Magett had receive the Ed. D from Northwestern University and had been hiredrom Seattle Public Schools Soonseveral board members were speaking of her as a possible permanent successor to Grant.

Shortlyafter Dr. Magett took over,the Boardvoted to go to the publicfor support of a bond issue and override election irMay 1985. A Tucson Citizen editoria warned, "Tucson spublic schools may be headed for big money trouble if the Legislature doesn't come through with a healthy appropriation.... Years of insufficient support from Phoenix has caused a shortfall that even a usterity can't take care of anymore."

Honorsand Awards

In spite of financial crises, positive recognition tinued to come to the school district, its employees, board members, and students in the 1980s. Soleng Tom, Raul Grijalva, and Laura Almquistwere each named Tucson's Man or Woman of the Year. Robert Carpenterwas a finalist for the national "Teache in Space's huttle program. John S. Brooksand Jody Simmons were each named Science Teache of the Year. Arthur Ratcliff was chosen Outstanding High Schon ding High

The Latest Construction

Harriet Johnson Primary School 6060 SJoseph Avenue, was named to honor a principal who was killed in 1990 in an automobile accident. Harriet Johnson had been principal of Corbett Elementary School for five years at the time of her death. Shebeganher career in TUSD as a special ducation teacher at Cholla Highand was department head at Santa Rita High. Ms. Johnson had been an

long-time teacher and administrator in the school district. Valenciata ught at both Rincon and Cholla High School and was also the head the district's legal and research department before retirement.

Theschoolboard has voted to build a newhigh school in the southwest area of the school district to relieve overcrowding at Puebloand Cholla High Schools The location, cost, and other relevant decisions have yet to be made at this writing. A connected major project is redrawing attendance boundaries for the entire school district to focus on populations hifts and the results of new construction and renovation sto existing schools An advisory committee is holding a series f meeting sat this time to gather information and the vi Two hours D.90(\$) F2/50.027c (\$)) 27/20 F2/50 F2/5
